## Quick Pack:

This multifunctional packaging machine, specially designed for non processed fruit and vegetables can produce packagings from the following materials (all on the reel):

- CLAF®-/PE-net, in combination with film ribbon on either front- of backside or on both sides of the packaging.
- Vertisac, presealed net- film combination
- PE-, PP-, of laminated film

### The standard machine features:

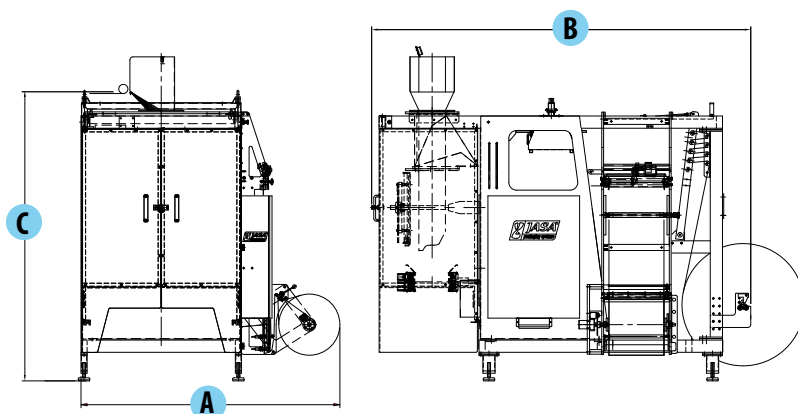

- constructions complete in stainless steel
- stainless steel electrical cabinet IP65
- PLC operating system
- up to 35 programs can be memorised and selected
- touch-screen display
- synchronisation for most weighing-/ dosing systems
- photocell to control the length of the bag
- photocell controlled infeed tunnel
- machine stop by end of reel detection
- side-infold (depth adjustable)
- finger-grip (2 holes) integrated in the selling system

### In accordance with CE-standards

the machine is equipped with the following safety systems:

- sealing jaw protection for not closing of the jaws with automatic machine stop
- in operating system integrated protections for breakdown, wire disconnection and not heated sealing jaws
- wide opening door covering the total sealing area

**Also available in inclined fillingtube version for fragile products!**

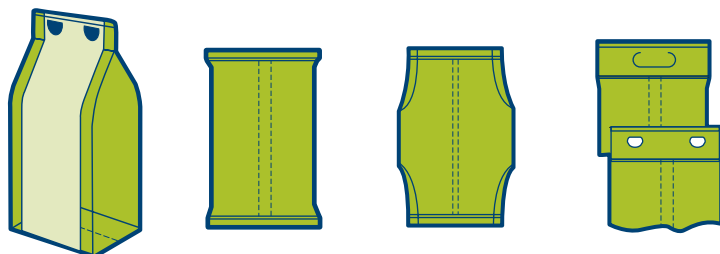

These drawings are rough sketches. Final designs differ per machine.

Technical specifications		Quick Pack	
Packing specifications			
bag width	mm	up to 350	
bag length, in one seal step (longer in multiple seal step)	mm	420	
speed	pack/min.	up to 38	
Machine dimensions			
A	mm	1695	
B	mm	2480	
C	mm	1440	
outside diameter film reel	mm	600	
weight	kg	840	
Electrical/pneumatical requirements		3-phase 400V / 50 Hz + 0 + A	
electrical capacity	kW	2	
pneumatical requirements	bar	6	
pneumatical capacity (max)	l/min.	400	
Options			
heatseal		<input type="checkbox"/>	
heatseal + punching device		<input type="checkbox"/>	
multiseal		<input checked="" type="checkbox"/>
